Mahone and the Negroes General Massone's recent declaration in an interview with a reporter at Charleston that the negro ought to be content with back seat in the political synagogue was characteristic of the man. He opposed the election of LANGSTON to Congress on the ground that the time had not come for negroes to dare to sapire to such honors. A good many persons are of the opinion that that time will never come, and we suspect that General MAHONE is one of them.

We do not know what General MAHONE'S object was in putting himself on record as being opposed to office-holding on the part of negroes; but we are confident that he has motive, and that this motive will be made public before many months shall have rolled over his head. The Washington Press pretends that it does not like MAHONE's decisration. We do. We give him credit for saying what all the negrophillats except cranks and fools know to be true, but what they are

and fools know to be true, but what they are afraid to-endorse. We quote from the Press as follows:

"The recent uttermoes of General William Mabone advising and directing the colored people to take back seats in political affairs has created deep feeling on the part of many colored men. " It is true that there is a class of white men at the South who are willing to accept office under the Harrison administration provided the colored man is ordered to the rear in that section of the regulatic. We do not believe that President Harrison has authorized General Mahone or any one else to make combinations with the Bourbon element of the South to strengthen the Republican party by the sacrifice of the manhood, the ambition and hopes of the black man, or that he will select as one of his advisers any person who advocales that the colored man shall be deprived of or relinquish any of the possibilities of advancement guaranteed to him by the amendments to the Constitution of the United States."

When the fifteenth amendment was under discussion in the United States Senate a first was to appeal from the judgment of the State Court and reverse it if it was wrong. It is easy, therefore, to see that a judgment is my favor would have been fatal to the state, but a judgment is my favor would have been fatal to the state, but a judgment is my favor would have been fatal to the state, but a judgment to the testate, but a judgment to the state Court is my favor would have been fatal to the state, but a judgment to the state court and reverse it if it was indexment in my favor would have been fatal to the state, but a judgment to the State Court and reverse it it it was indexment in my favor would have been fatal to the state, but a judgment against me left to the state, but a judgment and undo what the state Court and reverse it it it was judgment is my favor would have been fatal to the state, but a judgment against me left to the state, but a j

When the fifteenth amendment was under discussion in the United States Senate a motion was made to amend it so as to make his contest. But to the success of this very motion was made to amend it so as to make it provide that the right of citizens of the United States to vote "AND HOLD OFFICE" should not be denied by the United States nor by any State; but the Senate voted down the motion. We have no doubt that a similar motion was voted down in the House of Representatives. So that it is not true that the framers of the thirteenth, four-teenth, and fifteenth articles of amendment to the Federal Constitution intended to confer Epon negroes the right to hold office. On the Epon negroes the right to hold office, On the Epon negroes the right to hold office. On the Epon negroes the right to hold office, On the Epon negroes the right to hold office. On the contrary, the evidence afforded by the action of the Senate is conclusive that that body at least did not intend to confer that right upon them. The silence of the new amendments on the subject is itself a significant fact. The malignants went as far as they dared to go and there stopped. They left it to the developments of the future to decide whether the negro should be accounted qualified for officer or at the first of the first day that here are not again that the first day that here are not again that the court ordered them to be negro should be accounted qualified for officer or at the first day that here are not again that the court ordered them to be negro should be accounted qualified for officer or at the first day that the first of the first day that here are not again that the court ordered them to be negro should be accounted qualified for officer or at the first day that the first of the first day that the first of the first day that the first of the first day that negro should be accounted qualified for officer or at the first day that the first of the first day that the first day that the first of the first day that the first day tha negro should be accounted qualified for office or not. Let It Stand on Its Own Merits. Let It Stand on Its Own Merits.

The proposition to abolish the tax on tobacco should not be made to suffer by having
any other measure tacked to it. It is able to
stand alone—to stand upon its merits. We
make this remark because there has been a
disposition in some quarters to regard Mr.
Cownes's bill as a measure acceptable to the
Protection Demograps in their character as Protection Democrats in their character as Protection Democrats.

In the first place, there are but very few Democrats in the House of Representatives who can properly be classed as Protectionists. Mr. RANDALL himself, their leader, will be prompt, we doubt not, to advocate the bill for the abolition of the tobacco tax as a measure that can safely be supported on its merits. He has, in fact, been advocating it for years. The Cownes bill has no customs-duties in it. It is simply a measure intended to do justice to the people of Virginis and North Carolina particularly, but it will necessarily benefit tobacco-growers everywhere. The assumption that Demothe Cownes bill grows out of the previous so by his political masters in order to huassumption that the Republicans as a party will support that bill because it will so reduce the surplus in the Treasury as to render t unnecessary to touch the tariff.

The present is a Democratic House of Representatives. If that body wishes to do an act of simple justice that will strengthen the Democratic party in Virginia and North Carolina let it pass the Cownes bill. The Republicans in the House are said to be ready to do all they can to impart renewed vigor to their party friends in those two tes. We do not know that this rumor will turn out to be true, but we feel that it those States are declaring in favor of the are bill and the Cowles bill in such forcible language and with so serene a confidence in their success as cannot but create the impression that they have had from Washing-

pression that they have had from Washing ton intimations that their party friends is the House of Representatives will do all they can to secure the passage of those two measures.

We can all the importation of "presignation of the repeal of the fobacco-lax", No Vircinal congressman could justify himself to his censtituents for voting against the Cowras bill even it is defeat were made, as of course it will not be made, a party measure and were demanded by a caucus. It is sufficient for a Virginal congressman to know that the measure is one in which his constituent of his over demanded by a caucus. It is sufficient for a Virginal congressman to know that the measure is one in which his constituents are more deeply interested than they are in any question connected with the tariff. We have no doubt that we might say the same of the North Carolina congressmen to cast any rote which would, directly or inside the two contracts of the North Carolina congressmen to cast any rote which would, directly or inside the people of Virginia that the Cowrass bill. If I could have gained the case, it would have enabled me to put a speedy end to the convroversy. But losing them left me simply where I was before—to prosecute the matter along the besten route. The cases were attempts to reach the end by a short cut, in which I was folled. The suits were actions which I was foiled. The suits were actions against the Treasurer in trespass for his refusal of coupons, and proceeded upon the theory that by his wrongful act in refusing them he had made himself responsible for all consequent injuries that the tax-payer suffered, and that the subsequent suit against the fax-payer and judgment with costs was a resulting injury. The Court held that this judgment could not be held an injury in any legal sense, and that the tax-payer's reany legal sense, and that the tax-payer's re-dress was to appeal from the judgment of the State Court and reverse it if it was

(Special telegram to the Dispatch.)

RALEIGH, N. C., January 24.—The sessions of both branches of the General Assembly to-day were unmarked by incident. A bill was introduced in the Senate to incorporate the Milton and Yanceyville railway. Bills to prohibit the sale of pistols in the State and to amend the road laws were, after discussion, recommended. A resolution was adopted raising a joint select committee on roads. It is evident from the treatment which the bills received, which have for their object the improvement of public roads by taxation, that this Legislature will pass no general measure of that character. Bills were passed relieving grand jurors in any county from coming into open court except in cases where death is the penalty. The family is one of the original St. Louis ones, and has good standing. > DR. SHRADY'S PRESENT. How a Little Country Boy Remembered His Kindness.

A Kingston (N. Y.) special says: Dr. George F. Shrady, of New York city, during one of his frequent "runs" to Uister county related a pathetic little incident that came under his knowledge a year or so ago. The Doctor was in the country enjoying a little rest and recreation. During a ramble one day he saw a sickly-looking boy of about eight years of age resting by the rondside. Near the child, and gazing tenderly at him was a sweet-faced oid lady, whom the lad called "Granny." The child touched his cap politely to the Doctor, and touched his cap politely to the Doctor, and the little wan face lit up at a few kindly remarks that were made by the stranger. A day or two afterward the Doctor was fold that an old lady and a little boy wished to

see him.
"I could do nothing to stop his coming," explained the woman. "He says over an' over ever since the day he saw you, that you can make him well an' like other boys. He give me no peace night or day, an' so I have taken the liberty of bringing him to you to cure."

"The lath of the old lady and her little grantedlid me are head of the little grantedlid me."

grandchild was so touching," said the Doceffect a cure, and in time the youngster was running about, strong and well as his com-

Last Thanksgiving day a home-made box was delivered by express at Dr. Shrady's home in New York city. The box contained a turkey and a little note written in a boyish hand. It said: "dear doctor this is from the boy what you made well, I know the turkey is young and tender for I rased him from the egg myself." "I have often received munificent fees from grateful patients that my skill has belped relieve," said the Doctor, "but I was never more touched by a gift in all my professional experience than when that country chap's turkey in the rough little hox with the words 'Expresses all pade' written on every side was delivered to me."

A Bridegroom's Strange Freak.

A Mattituck (N. Y.) telegram says: The mystery surrounding the sudden disappearance of Thomas conway, of New Suffolk, on January 12th, the day he was to have been married to Miss Mary Sullitvan, has been cleared up. Yesterday afternoon Henry Kneeland a farmer near here, on going to his barn found in the hay-mow a man who was insane and nearly dead. He was identined as the missing bridegroom.

After having been attended by a doctor during the night Conway to-day recovered his senses and told the extraordinary story that he had been in the barn since the day of his disappearance, and that all the food he had had was what milk he got from the cows. He said he was unable to account for his strange actions. A Bridegroom's Strange Freak,

A Stickler for Etiquette The Queen of Sweden, like all German rincesses, observes the New York Tribune, princesses, observes the New York Tribune, is a stickler for cliquette, and yet she is so sympathetic toward the poor that she desires the "simplification of life." "Sometimes the conflict between these two interests leads to funny incidents. For example, on one to funny incidents. For example, on one occasion the Queen was told that some ladies did not care to be presented at court on account of the great expense incurred for a low-necked gown that could only be worn on this one occasion. This was a revelation to the Queen, and a thought struck her. 'Well,' she exclaimed, 'at my drawing-room everybody must come in called dresses.' 'And must they be cut low in the ncek?' one of the courtiers asked. 'Of course; you don't suppose I intend my guests to come in every-day attire?' 'But your Majesty forgets that these rowns, too, will be of no use afterward, for nobody wears low-necked called dresses.' 'Ah, don't they? I thought, of course, they did!'"

Romantic. There was a very romantic marriage to Castle Garden on Tuesday. The groom was Bowling Green, Va., Jacuary 24.—At ball-past 7 o'clock this evening an alarm of fire was sounded, and our people turned out can masse to find the large school-house belonging to the Bowling Green Female Seminary on fire. The fire spread so rapidly that it was impossible to save the building, but every effort was made to save the seminary proper. (By telegraph to the Dispatch.)

Oftawa, January 24.—The collectors of the customs in the maritime provinces have been instructed not to issue any further fishing licenses to American vessels under the modus vivends. A number of licenses granted last year will not run out till July next, the first issue being for twelve months from the date of issue, but as the sesson advanced, at the request of the Newfoundland Government, and to make the Canadian licenses uniform with the licenses of that colony, they were issued so as to be good only until December 31st. What the policy of the Government on this fishing license question will be next season is a matter still undecided, but for the present no more licenses will be issued. no more licenses will be issued. Fall of Wharves and Freight-sheds.

(By telegraph to the Dispatch.)

Savannah, Ga., January 24.—A part of the Ocean stemship wharves and freight-sheds collapsed to-day and precipitated 2,000 tons of guaso in the water. No one was at work at the time on the wharves, and there is supposed to be no less of life. The estimated loss to the company is \$40,000.

Peculiar NEW GOODS

To itself in many important particulars, Hood's Sarsaparilla is different from and superior to say other medicine.

Peculiar in combination, proportion and preparation of ingredients, Hood's Sarsaparilla poseases the full curative value of the best known remedies of the vegetable kingdom.

Peculiar in its medicinal merit, Hood's Sarsaparilla accomplishes cures hitherto unknown.

Peculiar in strength and economy – Hood's Sarsaparilla is the only medicine of which can truly be said, "100 doese one dollar." Medicines in larger and smaller bottles require larger doese, and do not produce as good results as Hood's Sarsaparilla.

Peculiar in its "good name at home" — there is more of Hood's Sarsaparilla sold in Lowell, where it is made, than of all other blood purifiers.

Peculiar in its phenomenal record of sales abroad, no other preparation has ever attained such popularity in so short a time. Do not be induced to take any other preparation. Besure to get

He said he was unable to account for his strange actions.

Nothing was known of Conway's disappearance until the guests had assembled for the we'ding ceremony and the appointed hour had passed, and when it was learned that Conway had drawn \$400 from the bank that day it was feared that he had met with foal play. The money was found intact in the young man's trunk at his hoos.
